

Total Cases to Date (Maine, Massachusetts, New Hampshire) (Cumulative Incidence) (2/1 to 6/16)

Data from NY Times (<https://github.com/nytimes/covid-19-data/>) (Updated 6/17/2020 4:24:47 PM EDT)

The trend of sum of Tot Cases for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

Total Cases / 10,000 to Date (Maine, Massachusetts, New Hampshire) (Cumulative Incidence Rate) (2/1 to 6/16)

The trend of sum of Tot Cases / 10,000 for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

Total Cases / 10,000 and Total Cases to Date (Maine, Massachusetts, New Hampshire) (Cumulative Incidence Rate) (2/1 to 6/16)

The trends of sum of Tot Cases / 10,000 and sum of Tot Cases for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

New Cases by Date (Maine, Massachusetts, New Hampshire) (Daily Incidence) (2/1 to 6/16)

The trend of sum of New Cases for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

New Cases by Date (Maine, Massachusetts, New Hampshire) (Daily Incidence) (2/1 to 6/16)

The trends of sum of New Cases and Moving Average of New Cases for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

New Cases / 10,000 by Date (Maine, Massachusetts, New Hampshire) (Daily Incidence Rate) (2/1 to 6/16)

The trend of sum of New Cases / 10,000 for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

New Cases / 10,000 by Date (Maine, Massachusetts, New Hampshire) (Daily Incidence Rate) (2/1 to 6/16)

The trends of sum of New Cases / 10,000 and Moving Average of New Cases / 10,000 for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

New Cases / 10,000 and New Cases to Date (Maine, Massachusetts, New Hampshire) (Daily Incidence Rate) (2/1 to 6/16)

The trends of sum of New Cases / 10,000 and sum of New Cases for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

New Cases / 10,000 and New Cases to Date (Maine, Massachusetts, New Hampshire) (Daily Incidence Rate) (2/1 to 6/16)

The trends of sum of New Cases / 10,000, Moving Average of New Cases / 10,000, sum of New Cases and Moving Average of New Cases for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

Time Trend of New Cases vs Total (Cumulative) Cases (Maine, Massachusetts, New Hampshire)

(2/1 to 6/16)

If the Total Cases "curve" is "flattening"; the number of New Cases per day will fall towards zero. Conversely, if the number of New Cases per day approaches zero, the number of Total Cases will no longer climb; and the curve is said to be "flattened." At that point, when the Total Cases curve is completely flat and the New Cases per day is zero, the epidemic is over.

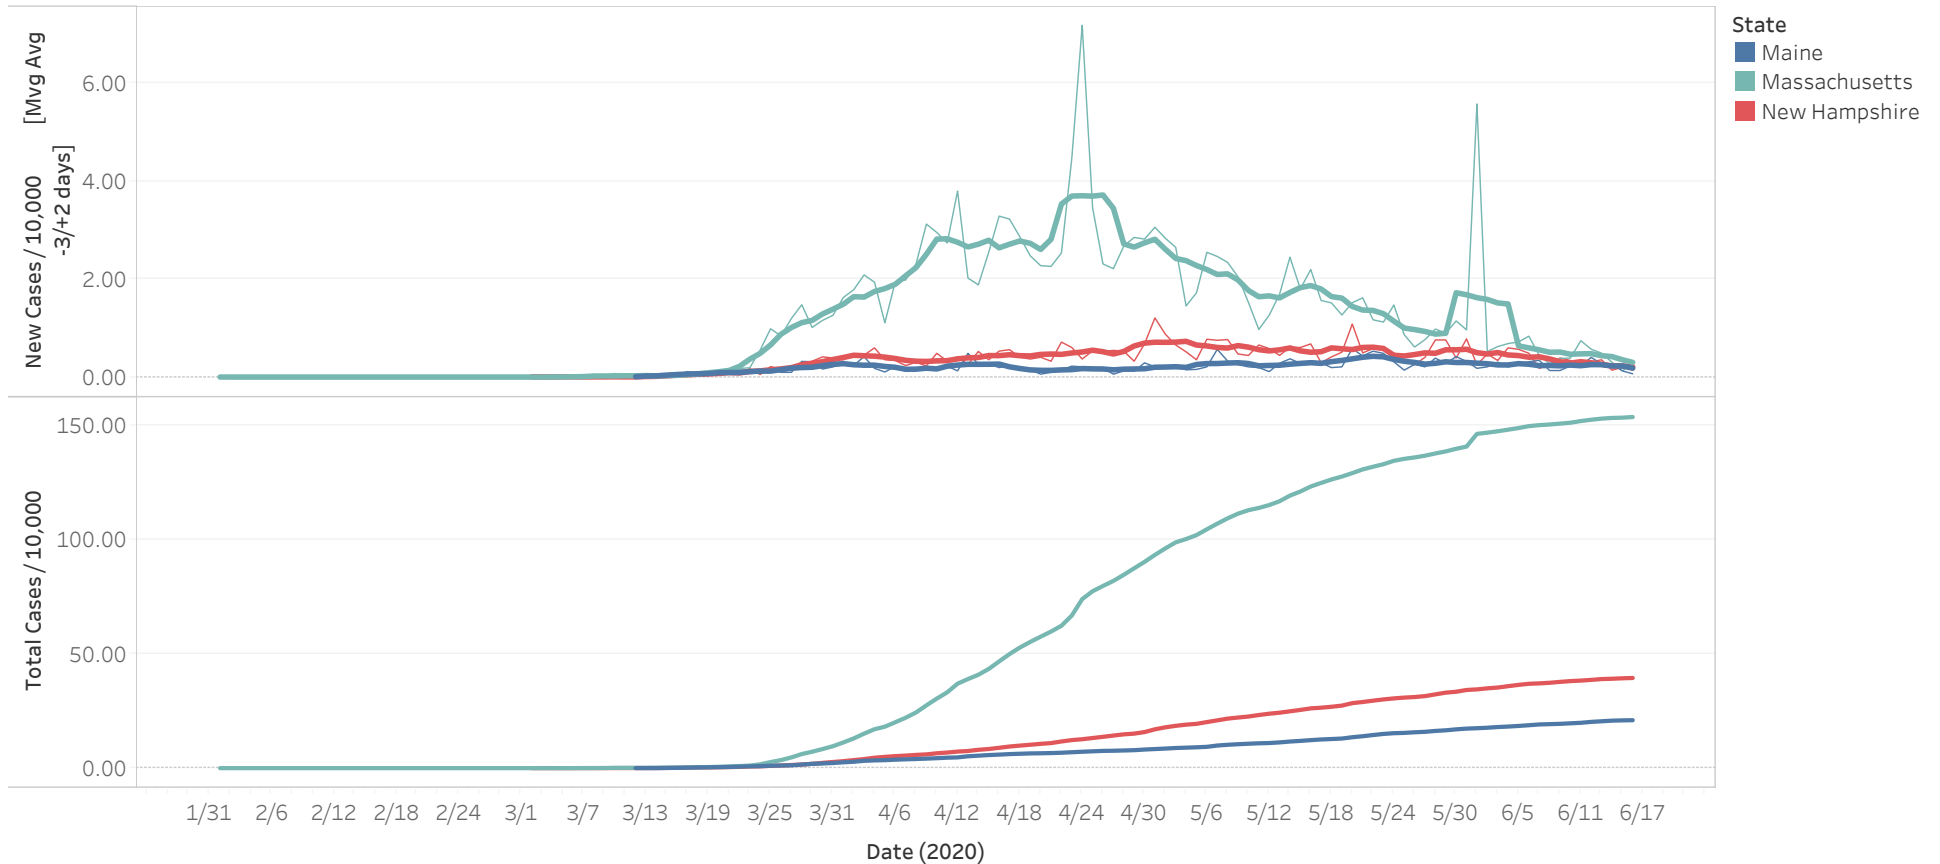

The trends of sum of New Cases, Moving Average of New Cases and sum of Tot Cases for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

Time Trend of New Cases / 10,000 vs Total (Cumulative) Cases / 10,000 (Maine, Massachusetts, New Hampshire) (2/1 to 6/16)

If the Total Cases "curve" is "flattening"; the number of New Cases per day will fall towards zero. Conversely, if the number of New Cases per day approaches zero, the number of Total Cases will no longer climb; and the curve is said to be "flattened." At that point, when the Total Cases curve is completely flat and the New Cases per day is zero, the epidemic is over.

(The per 10,000 puts all jurisdictions (US, State, County) on an equal footing, regardless of total population.)

The trends of sum of New Cases / 10,000, Moving Average of New Cases / 10,000 and sum of Tot Cases / 10,000 for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

Total Deaths to Date (Maine, Massachusetts, New Hampshire) (Cumulative Incidence) (2/1 to 6/16)

The trend of sum of Tot Deaths for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

Total Deaths / 10,000 to Date (Maine, Massachusetts, New Hampshire) (Cumulative Incidence Rate) (2/1 to 6/16)

The trend of sum of Tot Deaths / 10,000 for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

Total Deaths / 10,000 and Total Deaths to Date (Maine, Massachusetts, New Hampshire) (Cumulative Incidence Rate) (2/1 to 6/16)

The trends of sum of Tot Deaths / 10,000 and sum of Tot Deaths for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

New Deaths by Date (Maine, Massachusetts, New Hampshire) (Daily Incidence) (2/1 to 6/16)

The trend of sum of New Deaths for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

New Deaths by Date (Maine, Massachusetts, New Hampshire) (Daily Incidence) (2/1 to 6/16)

The trends of sum of New Deaths and Moving Average of New Deaths for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

New Deaths / 10,000 by Date (Maine, Massachusetts, New Hampshire) (Daily Incidence Rate) (2/1 to 6/16)

The trend of sum of New Deaths / 10,000 for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

New Deaths / 10,000 by Date (Maine, Massachusetts, New Hampshire) (Daily Incidence Rate) (2/1 to 6/16)

The trends of sum of New Deaths / 10,000 and Moving Average of New Deaths / 10,000 for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

New Deaths / 10,000 and New Deaths to Date (Maine, Massachusetts, New Hampshire) (Daily Incidence Rate) (2/1 to 6/16)

The trends of sum of New Deaths / 10,000 and sum of New Deaths for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

New Deaths / 10,000 and New Deaths to Date (Maine, Massachusetts, New Hampshire) (Daily Incidence Rate)

(2/1 to 6/16)

The trends of sum of New Deaths / 10,000, Moving Average of New Deaths / 10,000, sum of New Deaths and Moving Average of New Deaths for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

Time Trend of New Deaths vs Total (Cumulative) Deaths (Maine, Massachusetts, New Hampshire)

(2/1 to 6/16)

If the Total Deaths "curve" is "flattening"; the number of New Deaths per day will fall towards zero. Conversely, if the number of New Deaths per day approaches zero, the number of Total Deaths will no longer climb; and the curve is said to be "flattened." At that point, when the Total Deaths curve is completely flat and the New Deaths per day is zero, the epidemic is over.

The trends of sum of New Deaths, Moving Average of New Deaths and sum of Tot Deaths for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.

Time Trend of New Deaths / 10,000 vs Total (Cumulative) Deaths / 10,000 (Maine, Massachusetts, New Hampshire)

(2/1 to 6/16)

If the Total Deaths "curve" is "flattening"; the number of New Deaths per day will fall towards zero. Conversely, if the number of New Deaths per day approaches zero, the number of Total Deaths will no longer climb; and the curve is said to be "flattened." At that point, when the Total Deaths curve is completely flat and the New Deaths per day is zero, the epidemic is over.

The trends of sum of New Deaths / 10,000, Moving Average of New Deaths / 10,000 and sum of Tot Deaths / 10,000 for Date. Color shows details about State. The view is filtered on State, which keeps Maine, Massachusetts and New Hampshire.
